Over the years I have attended many Real Estate related seminars, received Top Sales Agent awards, etc. from the different offices I have been with and worked with many organizations to assist those in need in our community. All of these experiences have enhanced the skills and abilities I already possessed and have lead me to the path of Leadership roles.

In order to grow and enhance what Michigan Realtors already offers our members, everyone must work together. With a synergistic team – everyone has something they do well, when people are put in the right place, things get done and results happen. Keeping communications open with the Realtor Members that are in the field can help MR keep abreast of issues Realtors are facing. This will lead to discussion, ideas and solutions to these issues.

Our industry is changing so quickly and technology is playing a huge role in that change. I use to say “What’s next?”, now I say “What is new today?” We as an industry need to keep up and yes get ahead of what’s coming and prepare our Realtors so when the changes are here, Realtors are ready. I believe Realtors make a difference in the communities we live in, I believe Realtors have an important role in shaping the future of homeownership and I believe Realtors must worked together now to ensure our place in the future.

Fellow Realtors: Will you work with me and help me to ensure our future? Cast your vote for me as MR Director for Region 10 and let’s get started!
